

# **SUPERIOR RIG INNOVATIONS**

To Whom It May Concern.

I have worked with the crew and owners of HardChrome for many years and I have yet to meet another company that can outshine their workmanship, commitment, and professionalism. There has not been a task too daunting that HardChrome could not handle or diagnose, their 24/7 commitment to our equipment has helped us with our customer base and has given Superior Rig a great name when it comes to service.

Their expertise in hydraulic design is unmatched in my opinion and it shows in their ability to take a thought and execute the design to a fully functional mechanism with little input.

If you are looking for a company to complete your project from start to finish and offer great support after the fact you need look no further than HardChrome.

Respectfully,

Nicholas Morelli

President
